WORKERS' COMPENSATION RULES OF PROCEDURE WITH TREATMENT GUIDELINES

RULE 18 MEDICAL FEE SCHEDULE

7 CCR 1101-3 Rule 18, Exhibits

[Editor's Notes follow the text of the rules at the end of this CCR Document.]

Exhibit #1

Evaluation and Management - Medical Decision Making – Effective 1/1/2026

Number/Complexity of Problems Addressed (Chart A)

Only problems directly related to the injury and pertinent to the visit or treatment are counted.

Minimal	☐ 1 Self-limited / minor problem	<u>Self-limited or Minor Problem</u> – A problem that runs a definite and prescribed course, is temporary in nature, and is not likely to permanently affect health status.
Low	☐ 2+ Self-limited/minor problems; or ☐ 1 Stable chronic illness; or ☐ 1 Acute uncomplicated illness/injury; may or may not require hospital level care ☐ 1 Stable acute illness	<u>Stable, Chronic Illness</u> - A problem with an expected duration of at least one year or until the death of the patient. For the purpose of defining chronicity, conditions are treated as chronic whether or not the stage or the severity changes (e.g., uncontrolled diabetes and controlled diabetes are a single chronic condition). 'Stable' for the purposes of categorizing MDM is defined by the specific treatment goals for an individual patient. A patient who is not at their treatment goal is not stable, even if the condition has not changed and there is no short-term threat to life or bodily function. For example, a patient with persistently poorly controlled blood pressure for whom better control is a goal is not stable, even if the pressures are not changing and the patient is asymptomatic. The risk of morbidity without treatment is significant. <u>Acute, Uncomplicated Illness or Injury</u> - A recent or new short-term problem with low risk of morbidity for which a treatment is considered. There is little to no risk of mortality with treatment, and full recovery without functional impairment is expected. A problem that is normally self-limited or minor but is not resolving consistent with a definite and prescribed course is an acute, uncomplicated illness.
Moderate	☐ 1+ Chronic illness w/ exacerbation, progression, or Tx side effects; or ☐ 2+ Stable chronic illnesses; or ☐ Undiagnosed new problem w/ uncertain prognosis; or ☐ Acute illness w/ systemic symptoms; or	<u>Chronic Illness with Exacerbation, Progression or Side Effects of Tx</u> - A chronic illness that is actually worsening, poorly controlled or progressing with an intent to control progression and requiring additional supportive care or attention to treatment for side effects but that does not require consideration of hospital level care. <u>Undiagnosed New Problem with Uncertain Prognosis</u> - A problem in the differential diagnosis that represents a condition likely to result in a high risk of morbidity without medical intervention. <u>Acute Illness with Systemic Symptoms</u> - An illness that causes systemic symptoms and has a high risk of morbidity without treatment. For systemic general symptoms such as fever, body aches, or fatigue in a minor illness that may be treated to alleviate symptoms, shorten the course of illness or to prevent complications, see the definitions for 'self-limited or minor' or 'acute, uncomplicated.' Systemic symptoms may not be general, but may be a single

High	☐ Acute complicated injury ☐ Chronic illness w/ severe exacerbation, progression, or Tx side effects; or ☐ Acute/chronic illness/injury that poses threat to life or bodily function	system. <u>Acute, Complicated Injury</u> – An injury which requires treatment that includes evaluation of other body systems that are not directly related to the injured organ, the injury is extensive, or the treatment options are multiple and/or associated with risk of morbidity. <u>Chronic Illness with Severe Exacerbation, Progression, or Side Effects of Treatment</u> – The severe exacerbation or progression of a chronic illness or severe side effects of treatment that have significant risk of morbidity and may require hospitalization. <u>Acute or Chronic Illness or Injury that Poses a Threat to Life or Bodily Function</u> - An acute illness with systemic symptoms (symptoms affecting one or more organ systems), an acute complicated injury, or a chronic illness or injury with exacerbation and/or progression or side effects of treatment, that poses a threat to life or bodily function in the short-term without treatment.
-------------	--	---

Amount and/or Complexity of **Data to be Reviewed and Analyzed (Chart B)**

Tests & Documents (T&D)				T&D pts	Level of Data
Review of prior external note(s) from each unique source*		x 1 =			☐ 2 pts from at least 2 T&D or ☐ 1 pt from IHX If at least 1 box is checked, the level of data is LIMITED If not, the level of data is MINIMAL or NONE
Review of the result(s) of each unique test*		x 1 =			
Ordering of each unique test* or Discussion with the patient of possible test alternatives (documented)		x 1 =			
Assessment requiring an independent historian(s)(IHx)				IHx pts	
An individual who provides a history in addition to patient	0 or 1 max =				
Independent interpretation of tests (Intpr)				Intpr pts	
Independent interpretation of a test performed by another physician/ other qualified health care professional (not separately reported);	0 or 1 max =				☐ 3 pts from 3 T&D/IHX or ☐ 1 pt from Intpr or ☐ 1 pt from DISC If at least 1 box is checked, the level of data is MODERATE If not, the level of data is LIMITED or MINIMAL/NONE
Discussion of management or test interpretation (DISC)				DISC pts	
Discussion of management or test interpretation with external physician /other qualified health care professional/appropriate source (not separately reported)	0 or 1 max =				If at least 2 of the 3 boxes above are checked, the level of data is EXTENSIVE

*Each unique test, order, or document contributes to the combination of T&D category below. If the test is being billed on the same date, T&D does not apply

Test – Laboratory services, diagnostic imaging, psychometric, or physiologic data. A clinical laboratory panel (e.g., basic metabolic panel [80047]) is a single test. The differentiation between single or multiple unique tests is defined in accordance with the CPT® code set.

External – External records, communications and/or test results are from an external physician, other qualified health care professional, facility or health care organization.

External Physician or Other Qualified Healthcare Professional - An individual who is in a different group practice or who is of a different specialty or subspecialty. It includes licensed professionals that are practicing independently (e.g. PT, OT, nurse case manager.) It may also be a facility or organizational provider such as a hospital, nursing facility, or home health care agency.

Independent Historian(s)- An individual such as a parent, guardian, surrogate, spouse, caregiver, witness, supervisor, or co-worker who provides a history in addition to a history provided by the patient who is unable to provide a complete or reliable history due to developmental stage of the patient, or another mental condition(s) or because a confirmatory history is determined to be necessary. In the case where there may be conflict or poor communication between multiple historians and more than one historian(s) is needed, the independent historian(s) requirement is met.

Independent Interpretation - The interpretation of a test for which there is a CPT® code and an interpretation or report is expected. This does not apply when the provider is reporting the service or has previously reported the service for the patient. A form of interpretation should be documented, but need not conform to the usual standards of a complete report for the test.

Appropriate Source – Individuals who are not health care professionals, but may be involved in the management of the patient (e.g., lawyer, parole officer, power of attorney, case manager, clergy, teacher). It does not include discussion with family or informal caregivers.

Risk of complications and/or Morbidity or Mortality of Patient Management (Chart C) see examples on following page

Minimal	☐ Minimal risk of morbidity from additional diagnostic testing or treatment
Low	☐ Low risk of morbidity from additional diagnostic testing or treatment
Moderate	☐ Moderate risk of morbidity from additional diagnostic testing or Treatment
High	☐ High risk of morbidity from additional diagnostic testing or treatment

Risk – The probability and/or consequences of an event (an event is the medical intervention or treatment). The assessment of the level of risk is affected by the nature of the event under consideration. *For example, a low probability of death may be high risk, whereas a high chance of a minor, self-limited adverse effect of treatment may be low risk.* Definitions of risk are based upon the usual behavior and thought processes of a provider in the same specialty. Trained clinicians apply common language usage meanings to terms such as 'high', 'medium', 'low', or 'minimal' risk and do not require quantification for these definitions, (though quantification may be provided when evidence-based medicine has established probabilities). For the purposes of calculating medical decision making, level of risk is based upon consequences of the problems(s) addressed at the visit when appropriately treated. Risk also includes medical decision making related to the need to initiate or forego further testing, treatment and/or hospitalization.

Morbidity – A state of illness or functional impairment that is expected to be long-term duration in which function is limited, quality of life is impaired, or there is organ damage that may not be temporary despite treatment.

Minimal
99202/99212
Low
99203/99213

Level of the Presenting Problem (from Chart A) _____

Level of Data (from Chart B) _____

Level of Risk (from Chart C) _____

Overall level of MDM-two of three categories above must be at a specific level in order to claim overall MDM at that level _____

Examples of patient management or conditions		Level of Risk
☐ Rest ☐ Gargles ☐ Insect bite ☐ Contusion ☐ Bruise	☐ Elastic bandages ☐ Superficial dressings ☐ Minor non-sutured laceration ☐ Abrasion	MINIMAL
☐ Over-the-counter drugs ☐ IV fluids w/o additives ☐ Vaccine injection ☐ PT/OT ☐ Stable chronic low back pain	☐ Minor surgery w/o identified risk factors ☐ Superficial burn ☐ Simple sprain/strain (Grade 1) ☐ Simple laceration repair ☐ Superficial foreign body	LOW
☐ Prescription drug management (new, increase, decrease, discontinue, decision to refill) ☐ IV fluids w/ additive(s) ☐ Therapeutic nuclear medicine ☐ Chronic pain w/ exacerbation &/or side effects of tx ☐ New neurologic complaints in extremity (numbness, tingling) ☐ Disability counseling &/or work restrictions ☐ Inability to return to work, requiring detailed functional improvement plan ☐ Dx/ tx significantly limited by social determinants of health	☐ Minor surgery w/ identified risk factors ☐ Elective major surgery w/o identified risk factors ☐ Partial thickness burn < 10% total body surface area ☐ Moderate sprain/strain (Grade 2) ☐ Torn ligament ☐ Closed fracture(s) or dislocation(s) w/o manipulation ☐ Intermediate laceration repair ☐ Deep foreign body ☐ Head injury w/ brief loss of consciousness	MODERATE

☐ Drug therapy requiring intensive monitoring for toxicity ☐ Parenteral controlled substances ☐ Tx plan for symptoms causing severe functional deficits w/o supporting physiological findings or verified related dx ☐ Potential for significant permanent work restrictions or total disability ☐ Decision not to resuscitate, or to de-escalate care due to poor prognosis ☐ Management of addiction behavior or other significant psychiatric condition	☐ Emergency major surgery or trauma ☐ Elective major surgery w/ identified risk factors ☐ Full-thickness burn ☐ Partial thickness burn $\geq$ 10% total body surface areas ☐ Complex sprain/strain (Grade 3) ☐ Initial treatment of open fracture ☐ Complex laceration repair ☐ Initial loss of limb/digit ☐ Head injury w/ prolonged loss of consciousness ☐ Abrupt change in neurological status	HIGH
---	--	-------------

Time-Based Coding

Total Time on the Date of the Visit – (99202-99205, 99212-99215) - For calculation purposes, time for these services is the total time on the date of the visit. It includes both the face-to-face and non-face-to-face time personally spent by the provider(s) on the day of the visit and includes time in activities that require the provider but does not include time in activities normally performed by clinical staff.

Provider time includes the following activities, when performed and documented:

- Preparing to see the patient such as reviewing the pt's record
- Obtaining and/or reviewing separately obtained history
- Performing a medically appropriate history and examination
- Counseling and educating the patient, family, and/or caregiver
- Ordering prescription medications, tests, or procedures
- Referring and communicating with other health care providers when not separately reported during the visit
- Documenting clinical information in the electronic or other health record
- Independently interpreting and communicating results to the patient/family/caregiver

Provider time does not include:

- Completing a WC-164
- Activities related to QPOP
- Activities not included in the documentation
- Time associated with any other billed code

- Coordinating the care of the patient (case manager; discharge; instructions for post-op care)
- Time spent communicating with patient, family and/or caregiver through an interpreter
- Time spent on causation or apportionment analysis

Code	Time	Code	Time
99202	15-29	99212	10-19
99203	30-44	99213	20-29
99204	45-59	99214	30-39

Editor's Notes

7 CCR 1101-3 has been divided into smaller sections for ease of use. Versions prior to 01/01/2011 and rule history are located in the first section, 7 CCR 1101-3. Prior versions can be accessed from the All Versions list on the rule's current version page. To view versions effective on or after 01/01/2011, select the desired part of the rule, for example 7 CCR 1101-3 Rules 1-17, or 7 CCR 1101-3 Rule 17, Exhibit 1.

History

[For history of this section, see Editor's Notes in the first section, 7 CCR 1101-3]
